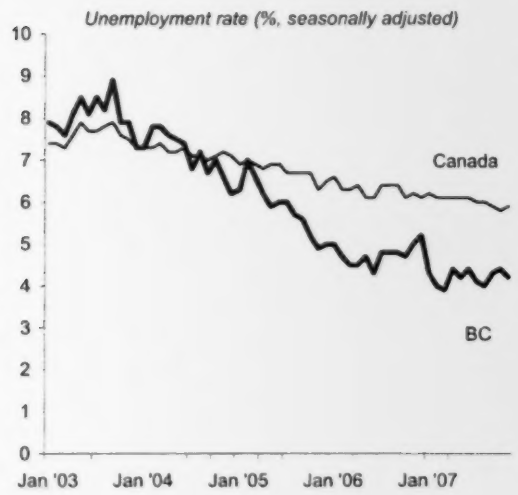
Labour Force Statistics ◆ November 2007

(All labour force statistics are seasonally adjusted, unless otherwise indicated)

Jobless rate falls to 4.2% in November

The province's unemployment rate fell to 4.2% in November, down 0.2 percentage points from the previous month. This change in the jobless rate came about as employment (+1.1%) grew faster than the number of people either working or looking for work (+0.9%). British Columbia's unemployment rate, along with the rest of the western provinces, continued to be among the lowest in the country.

Unemployment in BC is well below the national average



BC Stats

More jobs in the goods and services sectors

Employment in the province's goods sector jumped (+1.9%) in November as a result of BC's building boom. After a slight decline in the number of workers in the construction industry in October, employment in the industry (+6.4%) has picked up considerably. For the second consecutive month and the seventh month so far this year, the manufacturing industry shed a portion of its workforce (-0.8%). While employment in forestry, fishing & mining was virtually unchanged, the number of workers in the utilities industry fell (-1.6%).

The service sector, providing employment for more than three-quarters of workers in British Columbia expanded 0.9% in November. Eight out of eleven industries in the service sector added to their workforce, with information, culture & recreation (+7.5%), transportation & warehousing (+4.8%) and management & administration (+3.7%) posting the largest increases. While modest gains in employment were made in public administration (+1.2%), education services (+1.1%) and professional, scientific & technical services (+0.9%), fewer were employed in the trade (-0.8%) and health care & social assistance (-0.7%) industries.

Growth in employment is greater among women

Growth in employment was quite uneven between the sexes. While the number of men employed only increased 0.7%, there were 1.6% more women with jobs. Similar differences between the sexes are seen in the increase in the number of full-time jobs in the province, with growth in the number of women with full time jobs (+2.9%) outpacing that of men (+1.1%). The difference between the sexes points to the overall health of the services sector which employs nearly nine out of ten female workers in British Columbia. Overall, the total number of full-time positions grew 1.8% in November, while the number of part-time positions fell 1.7%.

The youth (aged 15 to 24 years) unemployment rate increased to 8.1%, while the jobless rate for those aged 25 years and older fell 0.4 percentage points to 3.4%. While public sector employment shrank 1.7% in November, the number of private sector jobs increased 1.9% as a result of the expansion in employment in the construction industry.

Unemployment rates fall in almost every region

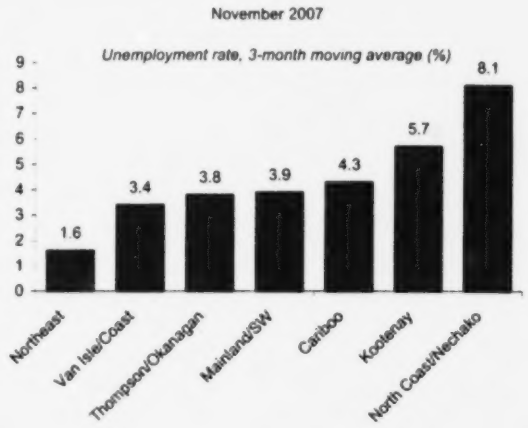
Regional unemployment rates were down in most regions of BC, ranging from 1.6 % (*3-month moving average, unadjusted*) in Northeast[1] to 8.1% in North Coast/Nechako.

Following several months of declining unemployment in North Coast/Nechako, the jobless rate in the region rose to 8.1%, 1.9 percentage points higher relative to November 2006.

An expanding labour force (+2.3%) and growth in employment (+3.6%) in Vancouver Island/Coast resulted in a 1.3 percentage point decline in the unemployment rate which now sits at 3.4%, its lowest point in more than a decade. Victoria (2.8%) and Nanaimo (4.1%), continued to see their respective unemployment rates fall. Unemployment rates in Northeast (1.6%) and Cariboo (4.2%) also reached their lowest point in more than a decade.

The job market improved in Thompson/ Okanagan (3.8%) and Kootenay (5.7%) as employment increased in both regions (+1.2% and 8.7% respectively).

Unemployment rates in Northeast, Vancouver Island/Coast and Cariboo at their lowest points in over a decade



BC Stats

Gains were also made in Mainland/Southwest, where the unemployment rate fell to 3.9%, down 0.2 percentage points. In Vancouver the jobless rate inched lower to match the regional average at 3.9%.

The Nation

Canada's unemployment rate inched 0.1 percentage points higher to 5.9% in November. The most notable increases in employment were made in New Brunswick (+1.5%), British Columbia (+1.1%) and Saskatchewan (+1.0%).

Selected Statistics	Nov-07	Oct-07	Nov-06
BC Unemployment Rate (%)	4.2	4.4	5.0
Canadian Unemployment Rate (%)	5.9	5.8	6.2
BC Employment ('000)	2,298	2,273	2,210
BC Labour Force Participation Rate (%)	66.7	66.2	65.8
Nov % change in employment relative to:	-	1.1	4.0
Nov % change in labour force relative to:	-	0.9	3.1

[1] Rates for Northeast, as well as some cities, are BC Stats estimates, calculated using data supplied by Statistics Canada. The very low unemployment rate in Northeast should be interpreted cautiously because it is based on a relatively small sample.

Labour Force Statistics

This report is based on statistics from the Labour Force Survey produced monthly by Statistics Canada. Questions and comments should be directed to Data Services at (250)387-0327 or write to BC.Stats@gov.bc.ca

Definitions and Explanatory Notes

Reference Week

Monthly estimates of employment, unemployment, and persons not in the labour force refer to the specific week covered by the survey each month, normally the week containing the 15th day.

Labour Force

The labour force is composed of those members of the civilian non-institutional population 15 years of age and over who, during the reference week, were employed or unemployed.

Employed

Employed persons are those who, during the reference week, either: (a) did any work at all, or (b) had a job but were not at work due to own illness or disability, personal or family responsibilities, bad weather, labour dispute, vacation, or other reason not specified above (excluding persons whose job attachment was to a job to start at a definite date in the future).

Unemployment

Unemployed persons are those who, during the reference week, either: (a) were without work, had actively looked for work in the past four weeks (ending with the reference week), and were available for work; or (b) had not actively looked for work in the past four weeks but had been on layoff and were available for work; or (c) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from the reference week, and were available for work.

Unemployment Rate

The unemployment rate represents the number of unemployed persons expressed as a percentage of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the number of unemployed in that group expressed as a percentage of the labour force for that group.

Participation Rate

The participation rate represents the labour force expressed as a percentage of the population 15 years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the labour force for that group expressed as a percentage of the population for that group.

Employment Rate

The employment rate(employment/population ratio) is the number of employed persons expressed as a percentage of the population 15 years of age and over. The employment rate for a particular group (age, sex, marital status, etc.) is the employment for that group expressed as a percentage of the population for that group.

Rounding

Estimates published by the Labour Force Survey are rounded to the nearest thousand but all derived values (totals, averages, rates, ratios, percent changes, etc.) are calculated from unrounded figures. Therefore, the sum of the individual rounded items may not equal the total. Unadjusted estimates rounded to hundreds are available from BC Stats on request.

Seasonal Adjustment

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, holidays, vacation periods, and cycles related to crops, production and retail sales associated with Christmas and Easter. It should be noted that the seasonally adjusted series contain irregular as well as longer-term cyclical fluctuations.
